- Partcipated in Hack-X-Amrita which is conducted our University(as a frontend developer).

PROJECTS

YOUTUBE VIDEO DOWNLOADER-PYTHON,FASTAPI

- Designed a youtube video downloader used HTML,CSS for the frontend and FASTAPI,Python for the backend.
- It enables the users to download the individual videos or entire playlists from the youtube channel.
- yt-dlp is the core downloading tool, responsible for extracting and downloading media from YouTube URLs.

MINI PROJECTS

ROCK PAPER SCISSORS |HTML,CSS,JavaScript

- It's a fun, interactive game for two players—you and the computer.Based on the option you choose,the result is displayed instantly,and scores are calculated automatically.

TIC TAC TOE |HTML,CSS,JavaScript

- Interactive Gameplay: Two-player mode where players take turns marking X and O on the grid. Winning Logic: Automatically detects wins, losses, and ties, and displays the results dynamically. Restart Option: Players can reset the game with a single click and play again.

QUIZ ON SPACE |HTML,CSS,JavaScript

- Thequiz is designed with engaging features: Each question comes with 4 options. Selecting the correct answer highlights it with a green background. Choosing a wrong answer highlights it with a red background and also displays the correct answer for learning. Next button allows smooth navigation to the following question. At the end of the quiz, the final score is displayed!

EDUCATION
